

SHERIFDEEN BILAL OLAMILEKAN

Machine Learning Intern | AI & Biomedical Data Practitioner

Nigeria • 08164797639 • bilalsherifdeen1@gmail.com • LinkedIn: bilal-sherifdeen • GitHub: bilalsherifdeen1-ux

PROFESSIONAL SUMMARY

Machine Learning Practitioner and final-phase Biochemistry & Molecular Biology undergraduate specializing in applied LLMs, supervised machine learning pipelines, and biomedical data analysis. As a Machine Learning Intern at FlyRank AI, built practical prompt-engineering frameworks and automated information extraction pipelines in Python that cut manual task turnaround time. Creator of EquiDx AI, designing algorithmic diagnostic triage systems for low-resource healthcare settings. Experienced in building reproducible data analysis scripts using Python, SQL, NumPy, and Scikit-Learn.

TECHNICAL SKILLS

Programming & Data	Python, SQL, NumPy, Pandas, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Testing
AI & Machine Learning	Supervised Learning, Model Evaluation Metrics, Large Language Models (LLMs), Few-Shot Prompting, AI Agents & Chatbots
Developer Tools	Git, GitHub, REST APIs, JSON Data Parsing, Process Automation Pipelines, VS Code
Domain & Scientific	Clinical Biochemistry, Biomarker Evaluation, Diagnostic Workflow Modeling, Quantitative Lab Data Analysis

PROFESSIONAL EXPERIENCE

FlyRank AI — Machine Learning Intern	July 2026 – Present
- Engineered automated prompt pipelines using Python and generative LLMs to perform structured semantic analysis on SEO datasets, reducing manual review latency. - Built entity extraction scripts leveraging Python and regular expressions to convert raw unstructured web crawl text into clean, queryable JSON tabular formats. - Automated recurring digital workflows by chaining LLM endpoints with internal automation scripts, directly eliminating manual repetitive data entry. - Benchmarked prompt configurations using precision-oriented evaluation criteria to guarantee consistency, relevance, and formatting stability in model outputs.	

SELECTED AI & MACHINE LEARNING PROJECTS

EquiDx AI — Diagnostic Screening Decision Support	Founder & Lead Researcher
- Architected an AI-enabled point-of-care clinical triage concept to expedite laboratory screening in resource-limited rural clinics. - Developed clinical data preprocessing scripts using Python and NumPy to normalize multi-variable patient biomarker inputs against standard reference intervals. - Formulated decision-tree heuristics and risk-stratification logic to classify potential diagnostic anomalies and reduce clinical turnaround times. - Authored technical validation documentation detailing sensitivity/specificity benchmarks, regulatory standards, and scalable deployment roadmaps.	
Automated SEO Intelligence Pipeline	FlyRank AI Project
- Developed a Python script integrating Pandas and NumPy to ingest, clean, and analyze high-volume keyword ranking data. - Implemented few-shot prompt classification models to automatically cluster search queries into transactional, informational, and navigational intents. - Generated automated analytical summary reports with quantitative validation checks, accelerating insight delivery for target workflows.	

TRAINING & CERTIFICATIONS

Anthropic AI/ML Curriculum — *Completed 20 Professional AI/ML Courses* 2026

- Comprehensive training covering Transformer architectures, LLM prompting strategies, AI agent workflows, and practical machine learning deployment patterns.

EDUCATION

Usmanu Danfodiyo University, Sokoto (UDUS) Expected 2027

B.Sc. in Biochemistry & Molecular Biology

- **Relevant Coursework:** Clinical Biochemistry, Molecular Genetics, Biostatistics & Data Interpretation, Laboratory Diagnostic Methods, Biotechnology.

LEADERSHIP & PROFESSIONAL ENGAGEMENT

National Biochemistry Students' Society (NSBS), UDUS Chapter — *President* 2026 – Present

- Provide executive leadership and strategic direction, organizing technical masterclasses on computational biology, bioinformatics workflows, and practical AI applications for biomedical students.
